## Fix HTML Issues in Comments

1. From within the nReports module, select 'Student Data'.

2. Click the edit button on the comment that is not displaying correctly on the report.

3. Click the 'Toggle HTML' button above the comment box. (You may need to click inside the comment box before the button becomes active).

4. Look through the code to see if there is anything unusual that you can remove. Codes such as <div> or <br> are just used for spacing and shouldn't cause any issues. Code that can cause problems often looks like '‘' or spans multiple lines.

Note: You can also edit the HTML code for comments the same way on the 'Home Group Comments' page.
